JavaScript **bold()** Method

 [JavaScript String Object](#)

Definition and Usage

The bold() method is used to display a string in bold.

This method returns the string embedded in the tag, like this:

```
<b>string</b>
```

Syntax

```
string.bold()
```

Browser Support

The bold() method is supported in all major browsers.

Example

Example

Display a text in bold:

```
<script type="text/javascript">

var str = "Hello world!";
document.write(str.bold());

</script>
```
