JavaScript setDate() Method

[JavaScript Date Object](#)

Definition and Usage

The setDate() method sets the day of the month (from 1 to 31), according to local time.

Note: This method is always used in conjunction with a Date object.

Syntax

```
Date.setDate(day)
```

Parameter	Description
day	Required. An integer between 1 and 31 representing the day of a month

Browser Support

The setDate() method is supported in all major browsers.

Example

Example

Set the day of the month:

```
<script type="text/javascript">

var d = new Date();
d.setDate(15);
document.write(d);

</script>
```

The output of the code above will be:

```
Sun Jan 15 2012 04:18:35 GMT+0200 (Egypt Standard Time)
```
