# JavaScript **setMilliseconds()** Method

 [JavaScript Date Object](#)

## Definition and Usage

The setMilliseconds() method sets the milliseconds (from 0 to 999), according to local time.

**Note:** This method is always used in conjunction with a Date object.

## Syntax

```
Date.setMilliseconds (millisec)
```

Parameter	Description
millisec	Required. An integer between 0 and 999 representing the milliseconds

## Browser Support

The setMilliseconds() method is supported in all major browsers.

## Example

### Example

Set the milliseconds to 192:

```
<script type="text/javascript">

var d = new Date();
d.setMilliseconds(192);
document.write(d);

</script>
```
