JavaScript setUTCSeconds() Method

JavaScript Date Object

Definition and Usage

The setUTCSeconds() method sets the seconds (from 0 to 59), according to universal time.

Note: This method is always used in conjunction with a Date object.

Syntax

```
Date.setUTCSeconds(sec,millisecond)
```

Parameter	Description
sec	Required. An integer between 0 and 59 representing the seconds
millisec	Optional. An integer between 0 and 999 representing the milliseconds

Browser Support

The setUTCSeconds() method is supported in all major browsers.

Tips and Notes

Tip: The Universal Coordinated Time (UTC) is the time set by the World Time Standard.

Example

Example

Set the UTC seconds to 01:

```
<script type="text/javascript">

var d = new Date();
d.setUTCSeconds(1);
document.write(d);

</script>
```

The output of the code above will be:

```
Thu Jan 05 2012 04:18:01 GMT+0200 (Egypt Standard Time)
```
