History go() Method

History Object

Definition and Usage

The go() method loads a specific URL from the history list.

The parameter can either be a number which goes to the URL within the specific position (-1 goes back one page, 1 goes forward one page), or a string. The string must be a partial or full URL, and the function will go to the first URL that matches the string.

Syntax

```
history.go (number|URL)
```

Browser Support

The go() method is supported in all major browsers.

Example

Example

Click on the button to go back two pages:

```
<html>
<head>
<script type="text/javascript">
function goBack()
{
    window.history.go(-2)
}
</script>
</head>
<body>

<input type="button" value="Go back 2 pages" onclick="goBack()" />

</body>
</html>
```

The output of the code above will be:

Go back 2 pages
