JavaScript **fontsize()** Method

[JavaScript String Object](#)

Definition and Usage

The **fontsize()** method is used to display a string in a specified size.

This method returns the string embedded in the `` tag, like this:

```
<font size="size">string</font>
```

Syntax

```
string.fontsize(size)
```

Parameter	Description
size	Required. An integer between 1 and 7 that specifies the font size

Browser Support

The **fontsize()** method is supported in all major browsers.

Example

Example

Display the text in a large font-size:

```
<script type="text/javascript">

var str = "Hello world!";
document.write(str.fontsize(7));

</script>
```
