# The History Object

[<< Previous](#)[Next Reference >>](#)

## History Object

The history object contains the URLs visited by the user (within a browser window).

The history object is part of the window object and is accessed through the window.history property.

 **Note:** There is no public standard that applies to the history object, but all major browsers support it.

## History Object Properties

Property	Description
<a href="#">length</a>	Returns the number of URLs in the history list

## History Object Methods

Method	Description
<a href="#">back()</a>	Loads the previous URL in the history list
<a href="#">forward()</a>	Loads the next URL in the history list
<a href="#">go()</a>	Loads a specific URL from the history list
