Screen width Property

 [Screen Object](#)

Definition and Usage

The width property returns the total width of the visitor's screen, in pixels.

Syntax

```
screen.width
```

Browser Support

The width property is supported in all major browsers.

Example

Example

Return the total width of your screen:

```
<script type="text/javascript">

document.write("Total Width: " + screen.width);

</script>
```

The output of the code above will be:

```
Total Width: 1024
```
