JS & DOM Reference JavaScript getUTCDate() Method

JavaScript Date Object

Definition and Usage

The getUTCDate() method returns the day of the month (from 1 to 31) for the specified date, according to universal time.

Note: This method is always used in conjunction with a Date object.

Syntax

Date.getUTCDate()

Browser Support

The getUTCDate() method is supported in all major browsers.

Tips and Notes

Tip: The Universal Coordinated Time (UTC) is the time set by the World Time Standard.

Examples

Example 1

Return the day of the month, according to universal time:

```
<script type="text/javascript">
var d = new Date();
document.write(d.getUTCDate());
```

Try it yourself »

</script>

Example 2

Return the UTC day of the month from a specific date:

```
<script type="text/javascript">
var d = new Date("July 21, 1983 01:15:00");
document.write(d.getUTCDate());
</script>
```
