Navigator appCodeName Property

Definition and Usage

The appCodeName property returns the code name of the browser.

Syntax

navigator.appCodeName

Browser Support

The appCodeName property is supported in all major browsers.

Example

Example

Return the code name of your browser:

<script type="text/javascript">

document.write("CodeName: " + navigator.appCodeName);

</script>

The output of the code above will be:

CodeName: Mozilla
