JS & DOM Reference Window status Property

Definition and Usage

The status property sets or returns the text in the status bar at the bottom of the browser.

Syntax

window.status

Browser Support

Note: The status property does not work in the default configuration of IE, Firefox, Chrome, or Safari. To allow scripts to change the text of the status, the user must set the dom.disable_window_status_change preference to false in the about:config screen. (or in Firefox: "Tools - Options - Content -Enable JavaScript / Advanced - Allow scripts to change status bar text").

Example

Example

Set the text in the status bar:

<html> <body> <script type="text/javascript"> window.status="Some text in the status bar!!"; </script> </body> </html>
