JS & DOM Reference JavaScript RegExp [abc] Expression

Definition and Usage

The [abc] expression is used to find any character between the brackets.

The characters inside the brackets can be any characters or span of characters.

Syntax

```
new RegExp("[abc]")
or simply:
/[abc]/
```

Browser Support

The [abc] expression is supported in all major browsers.

Example

Example

Do a global search for the character-span [a-h] in a string:

```
var str="Is this all there is?";
var patt1=/[a-h]/g;
```

The marked text below shows where the expression gets a match:

Is this all there is?
