# JS & DOM Reference JavaScript blink() Method

# JavaScript String Object

# Definition and Usage

The blink() method is used to display a blinking string.

This method returns the string embedded in the <blink> tag, like this:

<bli><bli><bli>dink>string</blink></br>

# Syntax

string.blink()

# Browser Support

The blink() method only works in Firefox and Opera. It is not supported in Internet Explorer, Chrome, or Safari.

# Example

### Example

#### Display a blinking text:

```
var str = "Hello world!";
document.write(str.blink());
</script>
```

<script type="text/javascript">

#### Try it yourself »
