JS & DOM Reference Location href Property

Definition and Usage

The href property returns the entire URL of the current page.

Syntax

location.href

Browser Support

The href property is supported in all major browsers.

Example

Example

Return the entire URL (of the current page):

<script type="text/javascript">

document.write(location.href);

</script>

The output of the code above will be:

http://w3schools.com/jsref/prop loc href.asp
