Screen availHeight Property

📁 Screen Object

Definition and Usage

The availHeight property returns the height of the visitor's screen, in pixels, minus interface features like the Windows Taskbar.

Syntax

```
screen.availHeight
```

Browser Support

The availHeight property is supported in all major browsers.

Example

Example

Return the available height of your screen:

```
<script type="text/javascript">

document.write("Available Height: " + screen.availHeight);

</script>
```

The output of the code above will be:

```
Available Height: 728
```
