Window blur() Method

🔺 Window Object

Definition and Usage

The blur() method removes focus from the current window.

Syntax

```
window.blur()
```

Browser Support

The blur() method is supported in all major browsers, except Opera and Chrome.

Example

Example

Assure that the new window does NOT get focus (send the new window to the background):

```
<html>
<head>
<script type="text/javascript">
function openWin()
{
myWindow=window.open('','','width=200,height=100');
myWindow.document.write("<p>The new window.</p>");
myWindow.blur();
}
</script>
</head>
<body>

<input type="button" value="Open window" onclick="openWin()" />

</body>
</html>
```

Try it yourself »

More Examples

Assure that the new window GETS focus
