Window screenLeft and screenTop Properties

🔝 Window Object

Definition and Usage

The screenLeft and screenTop properties returns the x and y coordinates of the window relative to the screen.

Syntax

```
window.screenLeft
window.screenTop
```

Browser Support

The screenLeft and screenTop properties are supported in all major browsers, except Firefox.

Note: For Firefox, use "window.screenX" and "window.screenY".

Example

Example

Return the x and y coordinates of the new window relative to the screen:

```
<html>
<head>
<script type="text/javascript">
function openWin()
{
myWindow=window.open('','');
myWindow.document.write("<p>This is 'myWindow'");
myWindow.document.write("<br />ScreenLeft: " + myWindow.screenLeft);
myWindow.document.write("<br />ScreenTop: " + myWindow.screenTop + "</p>");
}
</script>
</head>
<body>

<input type="button" value="Open 'myWindow'" onclick="openWin()" />

</body>
</html>
```
