# Location **port** Property

📕 Location Object

## Definition and Usage

The port property returns the port number the server uses for a URL.

**Note:** If the port number is 80 (which is the default port number), it is not specified.

## Syntax

```
location.port
```

## Browser Support

The port property is supported in all major browsers.

## Example

**Example**

Return the port number of the current URL:

```
<script type="text/javascript">

document.write(location.port);

</script>
```

The output of the code above will be:

**Try it yourself »**

📕 Location Object

## W3Schools' Online Certification

The perfect solution for professionals who need to balance work, family, and career building.

More than 6000 certificates already issued!

**Get Your Certificate »**
