JavaScript constructor Property

JavaScript Number Object

Definition and Usage

The constructor property returns the function that created the Number object's prototype.

Syntax

```
number.constructor
```

Browser Support

The constructor property is supported in all major browsers.

Example

Example

Return the function that created the Number object's prototype:

```
<script type="text/javascript">

var num=new Number(134.5);
document.write(num.constructor);

</script>
```

The output of the code above will be:

```
function Number() { [native code] }
```
