Screen availWidth Property

📁 Screen Object

Definition and Usage

The availWidth property returns the width of the visitor's screen, in pixels, minus interface features like the Windows Taskbar.

Syntax

```
screen.availWidth
```

Browser Support

The availWidth property is supported in all major browsers.

Example

Example

Return the available width of your screen:

```
<script type="text/javascript">

document.write("Available Width: " + screen.availWidth);

</script>
```

The output of the code above will be:

```
Available Width: 1024
```
