JavaScript toString() Method

🔺 JavaScript Boolean Object

Definition and Usage

The toString() method converts a Boolean value to a string, and returns the result.

Note: This method is called by JavaScript automatically whenever a Boolean object is used in a situation requiring a string.

Syntax

```
boolean.toString()
```

Browser Support

The toString() method is supported in all major browsers.

Example

Example

Convert a Boolean value to a string:

```
<script type="text/javascript">

var bool = new Boolean(1);
document.write(bool.toString());

</script>
```

The output of the code above will be:

```
true
```
