JavaScript abs() Method

📁 JavaScript Math Object

Definition and Usage

The abs() method returns the absolute value of a number.

Syntax

```
Math.abs(x)
```

Parameter	Description
x	Required. A number

Browser Support

The abs() method is supported in all major browsers.

Example

Example

Return the absolute value of different numbers:

```
<script type="text/javascript">

document.write(Math.abs(7.25) + "<br />");
document.write(Math.abs(-7.25) + "<br />");
document.write(Math.abs(null) + "<br />");
document.write(Math.abs("Hello") + "<br />");
document.write(Math.abs(7.25-10));

</script>
```

The output of the code above will be:

```
7.25
7.25
0
NaN
2.75
```
